

Key FFIS Table Commands

- N NEXT – to move to another table
- S SCAN – to access a record in an inquiry table when a portion of the table keys are known
- R REFILL – refills the inquiry table with the next sequential record
- L Table to Document – Enter the 2-character document ID in the Table ID field
- G GET – to get a specific record when all the table key fields are entered
- L LEAF – from a record on one table to the same record on another table
- < Returns you to the previous record once Refill has been used (can be used up to 5 times).
- B BACK – leaf back to previous table
- F FORWARD – to leaf forward between two tables after the LEAF action is used
- Z ZOOM – to move to a table. End the ZOOM with an E.
- E EXIT – to exit from a table or E used after the ZOOM action exits to the previous table
- E – also used to return from table to document after using PAUSE command
